About me

Video Game Design and Development student at EUNEIZ with a strong interest in Game Design, Level Design and gameplay programming. Interested in designing engaging levels and dungeons, creating gameplay mechanics and developing playable prototypes. Experienced with Unity and Unreal Engine, with additional knowledge of C#, Shader Graph, 3D workflows and game development pipelines.

Markel Quevedo Alvarez

Game Designer & Developer

Work experience

GET RID OF THOSE CORNERS

Game Design · Art

Worked on the game design and visual development of the project, contributing to the design of its gameplay systems, progression and overall player experience. I was also responsible for creating and implementing the game's visual assets and art direction.

INTOTHEWELL

Game Design · Programming · Art

Worked across the full development process, from designing the core gameplay and progression to programming the main mechanics in Unity. I also contributed to the game's visual development and implementation.

ITSASARGIA

Game Design · Programming

Designed and implemented the game's gameplay mechanics and platforming challenges, focusing on how each area introduces and develops its own mechanics. I also handled gameplay programming in Unity and worked on integrating the different systems into the playable experience.

Game Design skills

Experience designing gameplay mechanics, player interactions and progression systems, with a focus on creating clear and engaging gameplay experiences. Interested in level design, dungeon design and designing mechanics that encourage exploration and experimentation.

Programming & Technical skills

Experience developing gameplay systems and interactive mechanics using Unity and C#. Familiar with Unreal Engine and Shader Graph, as well as prototyping and implementing game systems.

Teamwork & Professional Skills

Experience working both independently and as part of a team on game development projects. Developed strong communication, organization, problem-solving and time-management skills through academic projects and professional work environments, while adapting to different responsibilities and deadlines.
